

INTRODUCING THE...

An international
zine on
Buffalo's fan
DIY Label

PNS zine

A first of
its kind!

2026

What is PNS Records??

PNS Records is a fictional/joke indie collective, made up of various folks across the Buffalo music scene.

We're not really trying to do much, just want to have fun & soak up the sun. People Need Songs!

Who is on PNS Records?

The collective (as of May '26) is made up of the members of Prairie Pavement & Bulldog Front, as well as a myriad of solo/ste Projects. But what are those? Let's find out...

Prairie Pavement (AKPP)
is an indie rock band
blending elements of
rock, jazz, and
emo music since
2021. 5 years!!!

Vanity Club is the music
and collective headed by
Sal, who likes to bounce
from genre to genre every
year or so.

Whispering into microphones
since 2022!

Bulldog Front is an
experimental solo project
led by former standard
Living member Larsen Prince.
Mixing elements of punk,
indie, emo, & alt rock,
there's something for everyone!

Colour Negative is a band that combines indie rock, classic power pop, garage rock, and raw energy to create a sound perfect for all your 4 off driving adventures!

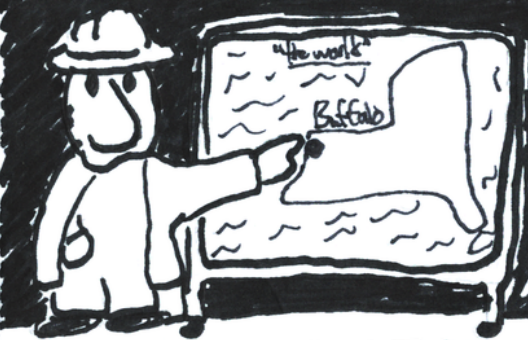

Galloping from their deep snowy stables in Buffalo, NY, these boys (& herd) started jamming together on the Dale Wisconsin Show. After a publicly broadcast feud between the two, they are now taking their first steps.

A terrible radio host, who reigns supreme over his terrible radio show, the Dale Wisconsin Show. Famously dunked on by Martin Scorsese, he plays what he calls "that good shit."

What's the point??!!

The goal of PNS is to bring a larger focus to our little slice of the Buffalo music scene. Are we over-saturating? Maybe. But we still do cool sh*t, so who cares? I don't.

...Now What?

* If you thought any of this was cool, check us out!

* We got social media! And a website → <https://pnsrecordsrecords.com>

* This is kinda us "starting out," so we're still working on stuff, but check the website + instagram for updates
